FOR IMMEDIATE RELEASE

Helsinki, January 19th 2010

Cheer Up Your, Or Your Friend's Day With A Phone Jewel  
Glittery Jewel Themes Now Available For Most Nokia Phones

Finndesign has published a boldly designed jewel collection that stands out from the masses. The jewel themes decorate the screen, complementing the overall look and feel of the phone. "These jewels don't hide themselves, they are rich in colour and glitter and are made to be worn proudly", explains Jukka Tuominen, the Managing Director of Finndesign about the design motives.

There are nine affordably priced jewels in the collection, one of which is free. You can choose a jewel to match your style, clothing, occasion or mood, if you like. They make an excellent present, for example for the upcoming Valentine's Day. And thanks to the modern online stores, you can purchase the presents in the last minute or even on the spot.

Finndesign Jewel Themes are available today in 190 countries through Nokia Ovi® Store. You can use your phone or a desktop computer to purchase them. The easiest way to get one of them? - Have your friend press the convenient "Send to Friend" button at Nokia Ovi Store.

The full Finndesign Jewel Theme collection is on display at [www.finndesign.fi](http://www.finndesign.fi)

A phone theme is a visual layer inside the phone that affects the looks but not the functionality of the phone.

Finndesign is an industrial design company located in Helsinki, Finland. They are specialising in improving the ease of use and aesthetic character of software products. Their clientele mainly consists of large, international high-tech companies active on the global markets.

Nokia Ovi® Store is a registered trademark of Nokia.
